Enter Username

Login

This is the main page that opens up when the user starts the program.

The user can enter either 'admin', 'stock' or existing user.

When clicked login. After entering admin. The scene will be directed to the admin page.

Admin

Logout

List of users

Add Users:

Add

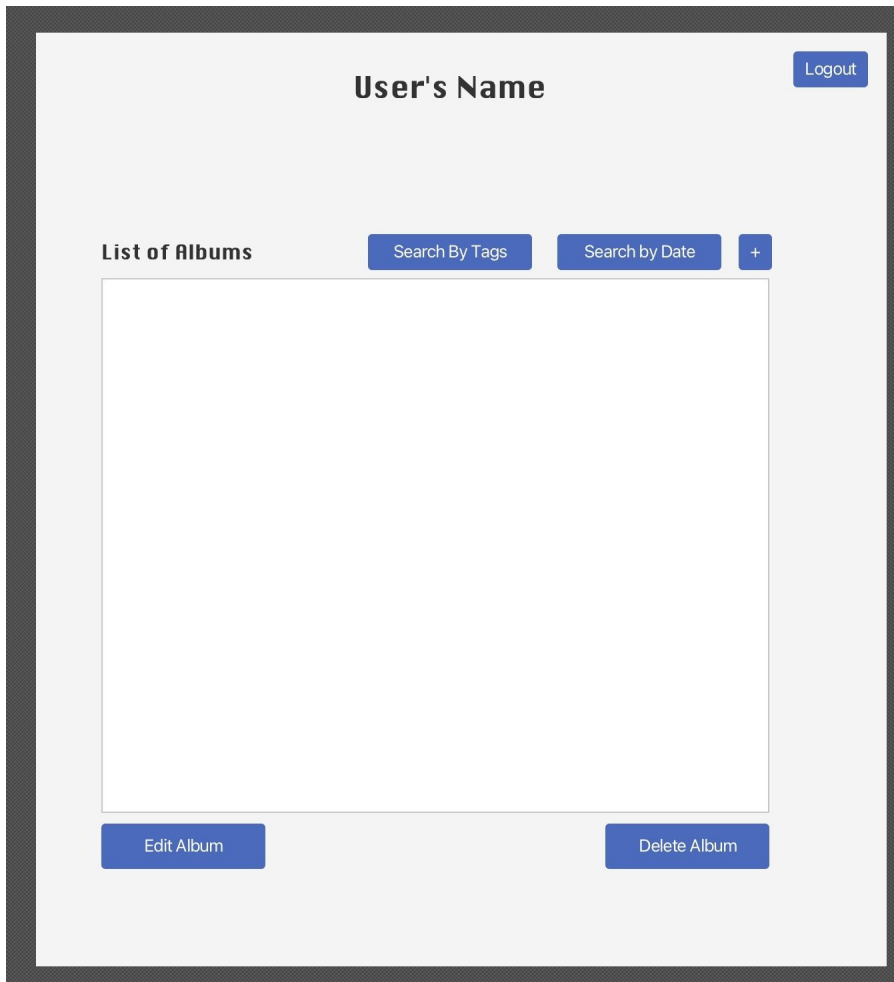

Delete

Once in the login page, there are three options, 'add users', 'delete user' and 'logout'

In this page the 'admin' is allowed to add new users or delete existing user.

There is also a logout button that when clicked, it will direct the 'admin' to main page

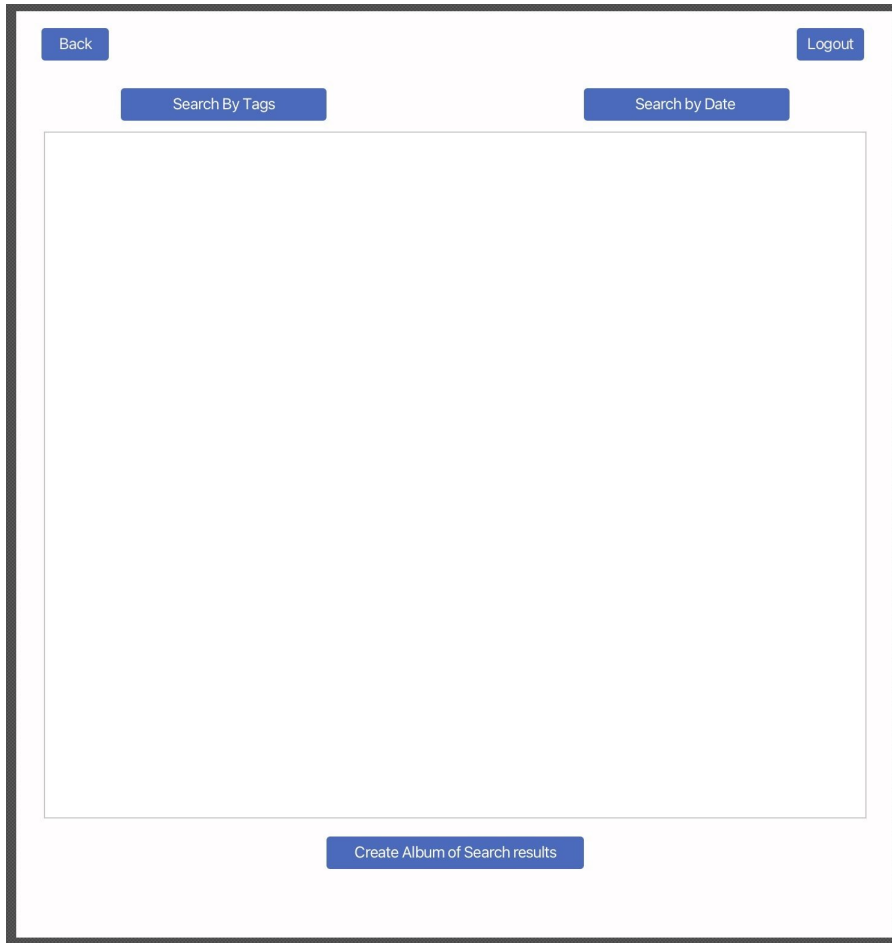

This page does not allow the 'admin' to access any user's information.

Now this is the non admin system, once an existing user logs in from the main page, this is the scene it will be directed to.

There are a few options in this scene, there is a list of albums that are added by the user, then there is a '+' button that allows users to add more albums, 'Edit Album' that will allow user to change the name of the album and 'delete album' that will allow user to delete an album based on selection.

Then there are two buttons 'search by tags' and 'search by date' when clicked on it will have a popup and will allow user to search accordingly.

This slide is connected to list of albums and it shows up when user searches by tags or by date, this scene will have the search results and then 'create album of search results' will allow the users to create a new album of the search results, once the user clicks on the 'create album of search result' it will have a popup and user will have to put the name of the new album.

There is also a 'back' button on the top left corner of the screen where user can go back to list of album scene.

SlideShow

Remove Photo

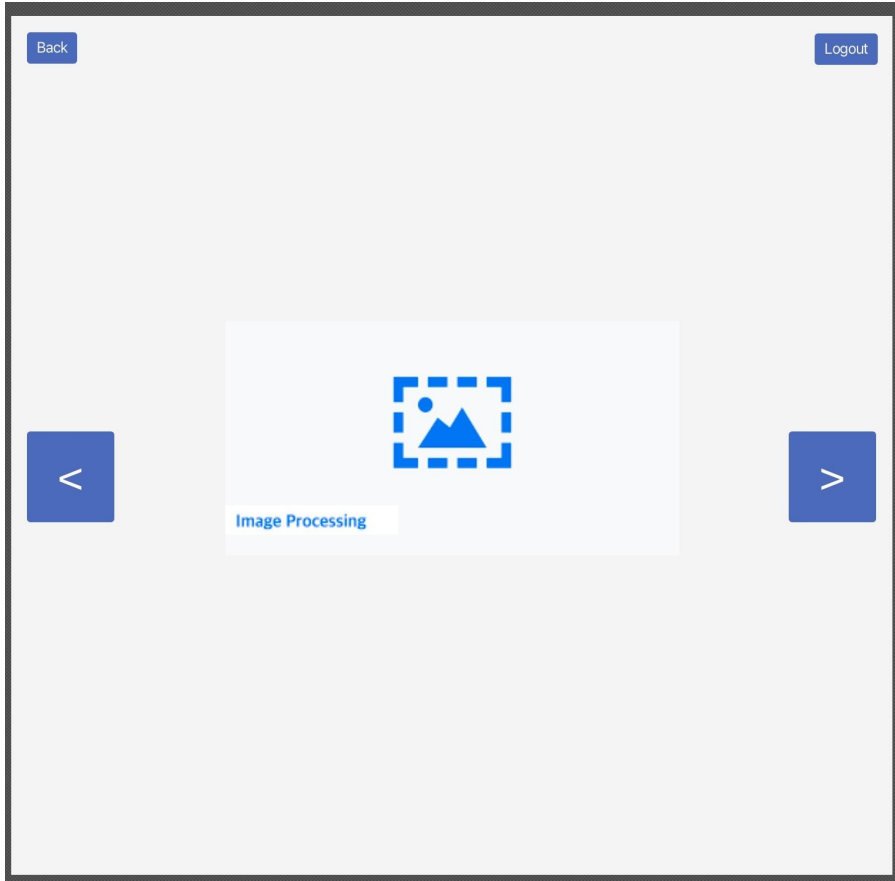

This scene shows up when the user clicks on an album from the list of album page.

This scene will allow user to add remove pictures, caption/reception, and add tags to a picture.

There is also a 'copy' button which give user the ability to copy the selected picture to another album while keeping the picture in the initial album.

There is also a 'move' button which will allow user to move the selected picture to a different album where once moved the picture will be gone from the initial album and will move to user selected album.

There is also a slide show button which will allow user to see the pictures in bigger size and will be able to see the pictures in a sequence.

This scene appears when 'slide show' is clicked.

There are 4 options on this scene 'back' which send the user to photos list page.

'Logout' which sends users to the main page and there are also options to move left and right that are represented by '<' and '>'.
